

Career Services

NMJC's Career Development Advisor can review and discuss career options with students at any time. NMJC's Career Coach software, available on the NMJC website, is a tool for anyone to be able to search our programs and different career paths using real-time data and statistics. Career Coach also allows you to create your résumé as well as search for and apply to local jobs and careers. If you are unsure what you want to study or what your career goals are, Career Coach offers personality assessments to identify your strengths.
